PROFILE

A Full-Stack Developer and AI Enthusiast specializing in React.js, Python, and PostgreSQL. Experienced in building robust web applications and integrating Machine Learning models, specifically utilizing YOLO and computer vision for automated detection systems. Adept at managing end-to-end development, from database architecture to responsive front-end implementation, while possessing proven time management skills to effectively balance academic and professional commitments. Available for freelance projects or full-time (remote/hybrid) positions to deliver effective digital solutions

SKILLS

- Front-End Development : React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- Back-End Development : PHP, Node.js , REST API
- AI & Machine Learning: Python, YOLO (Object Detection), OpenCV, Computer Vision
- Tools & Others : Git, GitHub, Docker, Supabase, Postman, Microsoft Office

PROJECTS

Hybrid Fiber Monitoring System | Next.js, PostgreSQL, Docker | [Fiber Monitoring](#) (Demo Link)

- Developed a full-stack web application for the management and visualization of complex fiber optic data, including ODP, ODC, POP, and FDT information.
- Implemented an interactive and responsive front-end using React.js, displaying data in tables, maps (with Leaflet.js), and detailed cable routes.
- Key features include CRUD (Create, Read, Update, Delete) functionality, real-time search, interactive map data visualization, and fiber optic core status management.

AI Expense Tracker | Python, React.js, PostgreSQL

- Developed an AI-powered expense tracking application featuring receipt scanning capabilities, utilizing Optical Character Recognition (OCR) to automatically extract key information such as item names, purchase dates, and prices from physical receipts.
- Engineered a Python-based backend to process the scanned text, automatically categorizing and converting the raw data into structured expense entries stored securely in a PostgreSQL database.
- Built a responsive React.js front-end that allows users to easily upload receipt images, verify the extracted data, and monitor their financial habits through interactive visual dashboards.

LEADERSHIP EXPERIENCE

Student Council President | SMK Islamic Centre Baiturrahman, Semarang | 2020 – 2021

- Led a team of 50+ members to design and execute over 15 annual programs.
 - Developed strong communication, negotiation, and project management skills in a dynamic environment.
-

CERTIFICATIONS

- **Junior Network Administrator**
Certified in computer network engineering by the Professional Certification Body for Digital Technology (LSP-TD).
 - **Junior Web Development Dicoding Academy**
Completed training focused on web development and modern programming fundamentals for the IT industry
-

EDUCATION

Semarang State Polytechnic

Sep 2023 - 2026

Diploma (D3) in Informatics Engineering (GPA > 3.67)
